Inteo™ makes the world revolve around you

Your individual needs and preferences make you unique. They govern the way you experience the world and, in turn, they shape the way you are perceived by the people around you.

When choosing a hearing aid, you should expect a device that matches your unique needs and preferences – an instrument that responds to your individuality. Inteo understands you are who you are. The revolutionary

new technology inside Inteo is designed to make the world fit your hearing requirements rather than the other way around, bringing you the sounds you want and need.

Developed by Widex – the undisputed technology leader in the hearing aid industry – Inteo represents an entirely new way of bringing the sounds of the world to you. With its cutting-edge Dynamic Integrator, Inteo is the first hearing aid that constantly

takes your personal preferences into account when creating the ideal listening environment for you.

With Inteo you don't have to change to fit in the world. Inteo will tailor the world to fit you.

A photograph of a clothing store interior. In the foreground, a woman in a light-colored jacket and dark pants walks from right to left. In the middle ground, a man in a light blue blazer stands near a counter, looking towards the camera. In the background, another man in a light blue blazer is looking at a jacket. The store is filled with racks of clothing, including jackets and trousers. A white door is visible on the right side of the store. A white, angular text box is overlaid on the left side of the image.

**Understand everything
around you – even when
people talk to you from
behind**

Keep focused on your decisions
at your workplace – and let Inteo
focus on the voice.

We all rely on communication, be it with relatives, friends or colleagues. With Inteo, effortless communication is no longer restricted to one-to-one conversations with the person in front of you.

Inteo is the only hearing aid in the world that detects voice in your surroundings and provides unprecedented speech understanding, regardless of the location of the person talking to you.

**Enjoy a more detailed
listening experience with
sounds you haven't heard
in years**

Inteo does for hearing what night vision goggles do for sight. Inteo brings high-pitched sounds back to you, such as the cymbals in a jazz band, rustling leaves or bird song. With Inteo at home, you'll know whether it is the doorbell or the phone that is ringing.

Inteo detects the otherwise inaudible sounds and transposes them to fit your individual hearing abilities.

No matter the environment Inteo ensures that you hear distinct alarm signals.

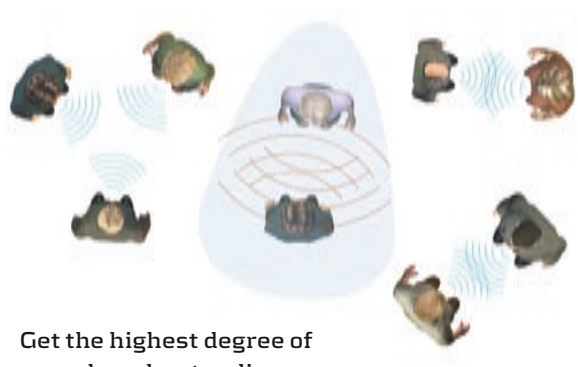

Experience new sounds

**Experience unrivalled
speech understanding
in noisy sound
environments**

The patented technology in Inteo ensures a demonstrably higher degree of speech understanding in noisy situations compared to other hearing aids. Whether you are having a conversation in your car or discussing where to go next in the busy shopping centre – with Inteo words come more easily.

Get the highest degree of speech understanding in noisy situations.

**Choose a smaller
hearing aid
or an open fitting
without compromise**

Inteo's unique active feedback cancelling system allows more amplification than any other equivalent hearing aid by removing the problem of feedback whistling.

With Inteo you can choose a smaller in-the-ear model, or possibly tailor your listening experience with an open fitting that can give superior comfort with a natural representation of your own voice.

Forget worries about feedback whistling when inserting the hearing aid.

Choose an open fitting or a smaller hearing aid without compromising your hearing ability.

**We invite you to experience Inteo
– where cutting-edge hearing aid
technology meets the fine art of
tailor-made user satisfaction.**
