

A model for everyone

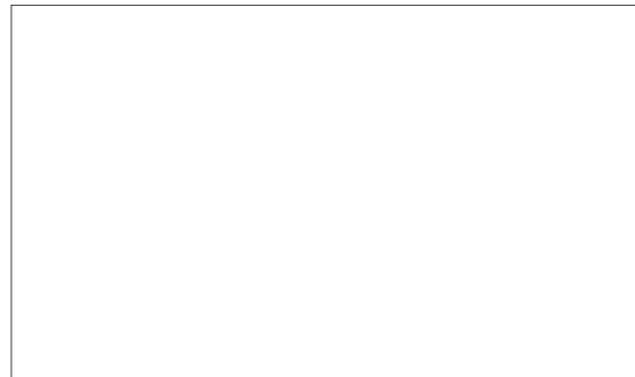

REAL is available in a wide range of models to suit every type of hearing loss. From discreet micro, mini and power BTE's to a CIC and an ITE, the Widex REAL™ series has a model for you.

It is our mission, through originality, perseverance and reliability, to develop high quality hearing instruments that give people with hearing loss the same opportunities for communication as those with normal hearing.

Real sound – real Widex technology

Sometimes it can be difficult to follow exactly what is going on in your environment. With the Widex REAL™ series you can come closer to everyday life. If you're looking for a simple but quality hearing aid that gives you the ultimate in listening comfort, then REAL is for you.

Featuring advanced and unique Widex technology, REAL is an affordable but state-of-the-art hearing aid that does not compromise performance or sound.

Easy to use and discreet in design, REAL aims to offer superb speech intelligibility, less feedback and better sound. Meaning that you can quickly come closer to the real world of sound and not be left out.

REAL offers you the reassurance of renowned Widex sound technology together with a simple, easy to use and discreet hearing aid. REAL comes with a sophisticated range of features to make sure you get the best out of it.

We at Widex know that speech intelligibility and listening comfort are of vital importance and that's why REAL comes with our unique signal processing platform, ISP. Integrated Signal Processing™ technology continuously controls and coordinates all functions in your hearing aid automatically in response to changes in your listening environment. This helps you hear sounds naturally, comfortably and clearly.

What's more, the Widex REAL™ series also comes with proven Widex features to make your listening experience more enjoyable and your sound more real:

- **Enhanced Dynamic Range Compression**

The EDRC compression system ensures that soft sounds, such as dripping water, are audible, face-to-face conversation is intelligible and loud sounds, such as a crowd, remain comfortable.

- **Locator**

The Locator automatically focuses REAL on sound sources in front of you, no matter what the environment. This helps you hear better in everything from wind noise to conversations at a party.

- **Classic noise reduction**

With Classic noise reduction, you're able to move around in comfort even in noisy environments such as in a crowd or a shop. This improves listening comfort in everyday situations, while emphasising clearer speech over background noise.

- **Feedback canceller**

The Feedback canceller constantly monitors changes in the listening environment that may cause feedback, giving less feedback and less annoying whistling without compromising sound.

- **EcoTech II**

With the unique EcoTech II system, REAL only uses battery power when in active use.

- **Quick and easy fitting**

Widex REAL is quick and easy to fit so you can enjoy the benefits of your hearing aid as quickly and simply as possible. By measuring the user's hearing directly through REAL, your hearing professional can ensure a precise and detailed analysis of your hearing profile.
